

## INFORMATION ZERAMEX® P6 DRILLS

The information pertains to all ZERAMEX® P6 system drills! There are new drill bits available for the ZERAMEX® P6 system, which look different from their predecessors.

### Additional laser markings

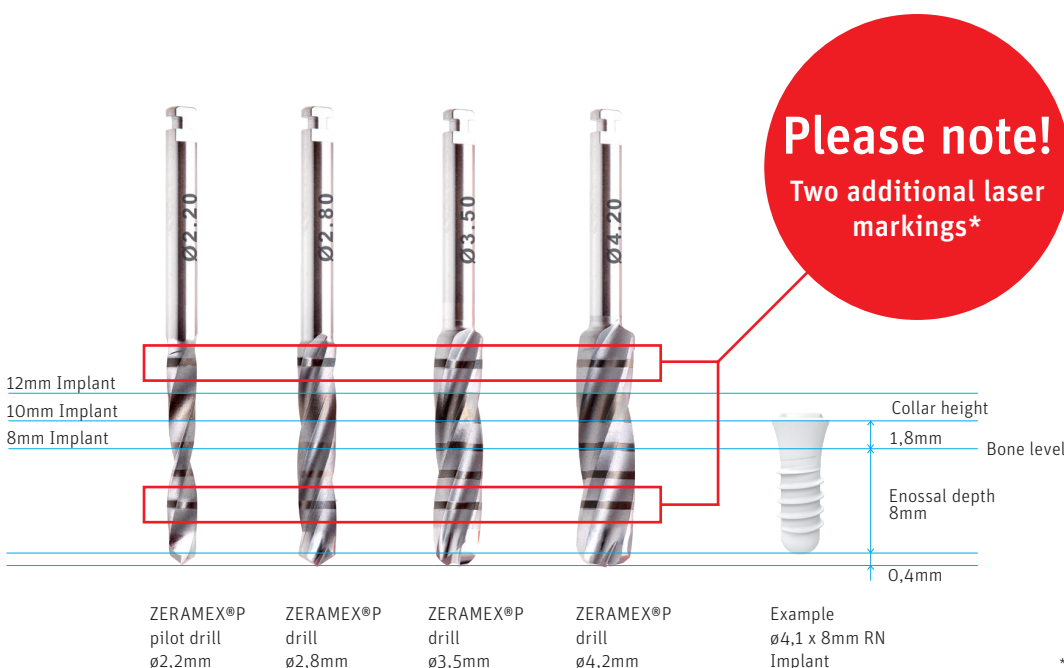

The difference is only in appearance. The new drill bits simply feature **two additional laser markings** (see images).

These additional laser markings are added by the drill bit manufacturer for the production of new implant systems and **do not affect the functioning of the ZERAMEX® P6 system.**

### Inspect and update the drill protocol for compliance

To guarantee proper handling, please ensure that you have the correct ZERAMEX® P6 drilling protocol available. You can order the necessary version of the ZERAMEX® P6 drill protocol through the regular order service if your drill protocol is no longer compatible with your drills.
